DUAL-FREQUENCY

ProMark 200

ProMark 200

ProMark 200 is the most cost-effective dual-frequency network RTK solution from Ashtech. Embedded BLADE technology provides outstanding, long-range RTK performance, fast initialization and centimeter-level accuracy. Together with the comprehensive Ashtech FAST Survey™ field software, the ProMark 200 meets the demanding expectations from professional land surveyors.

Ashtech ProMark 200 RTK rover includes extended wireless network communications, large memory, fast processor, Windows Mobile 6.5 operating system; all in a lightweight and very rugged handheld form factor for maximum mobility. The mix of exceptional RTK performance and compact design makes the ProMark 200 an extremely powerful and appealing network RTK rover solution.

Advanced GNSS Solution

- Ashtech BLADE technology for precise RTK
- All-in-view, dual-frequency rover
- Handheld real-time cm-level accuracy

Designed For Efficient Network RTK

- Fast fix with short initialization time
- Built-in GSM/GPRS, WLAN, and Bluetooth wireless connectivity
- Lightweight and rugged handheld design for comfortable use

Best Value For A High-End Survey Solution

- Minimal cost for maximum productivity
- Powerful and complete FAST Survey field software
- Versatile handheld for pre-surveys and GIS jobs
