

## T18 RNDIS Activesync

- a) Make sure Windows Media Device Center (WMDC) has been already installed in PC, formerly active sync for Windows XP. If not, please download from this link below and install it.

<https://www.microsoft.com/en-US/download/details.aspx?id=3182>

- b) Choose 'Enable advanced network functionality' by clicking Setting->System->USB to PC.

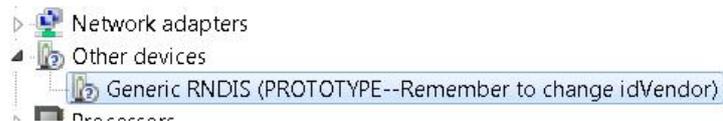

- c) Connect T18 to a PC with USB cable.
- d) PC will search an appropriate driver for T18 and install automatically. A similar device will be shown in Device Manager

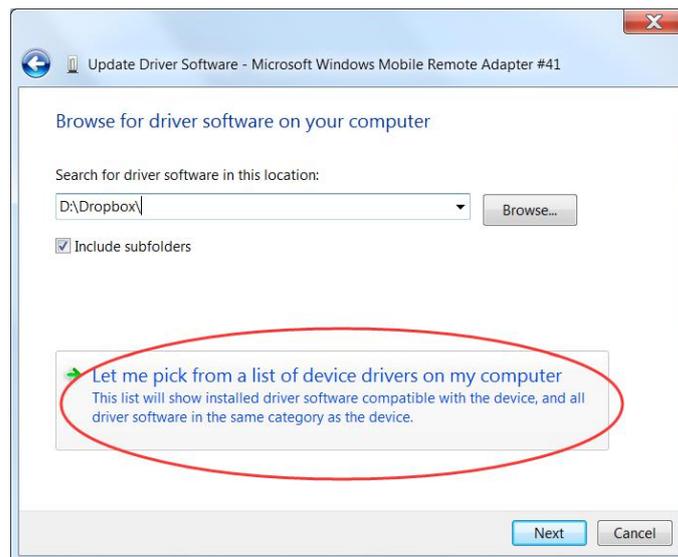

- e) The  icon will appear in the tool bar of PC then Active Sync/WMDC will launch as follows,

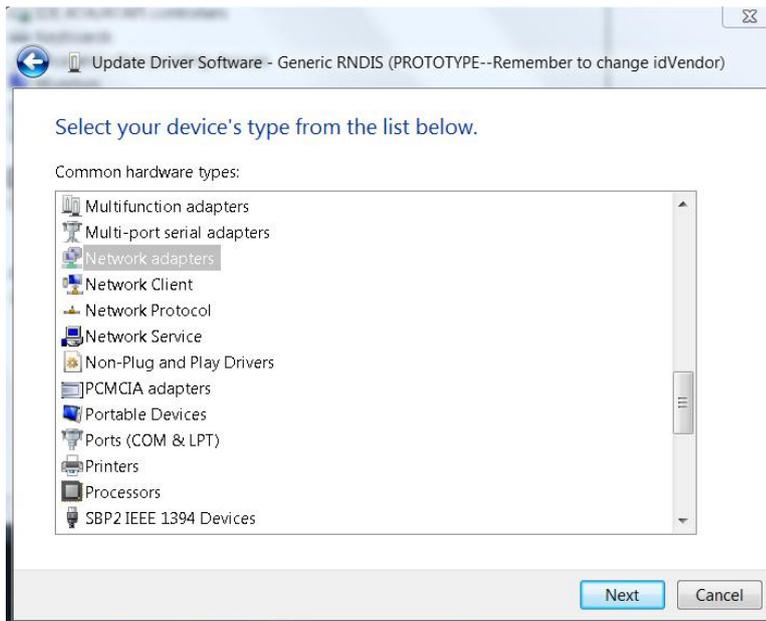

- f) If WMDC doesn't launch, follow the steps below to check its driver first.
- Check whether a suitable driver of T18 has been installed or not by PC Device Manger. If not, unrecognized device will be present in 'Device Manager'

- Right click on the 'unrecognized device', choose 'update driver software', then click 'Let me pick from a list of device drivers.....' on the Dialog box.

- Choose 'Network adapter' for Win7 as the figures, or choose 'Microsoft Corporation' for Win10.

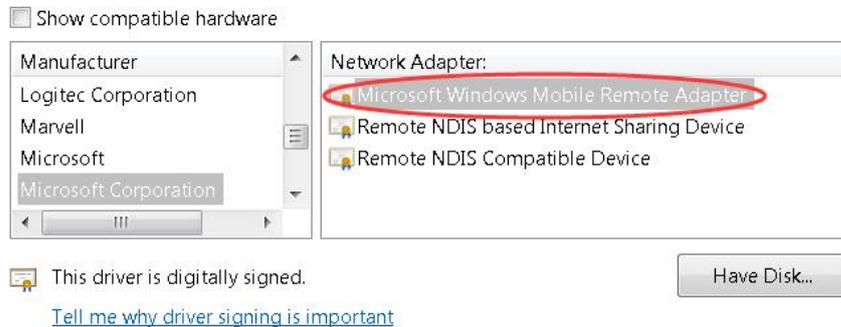

- iv) Then choose 'Microsoft Windows Mobile Remote Adapter', click Next as below,

#### Select Network Adapter

Click the Network Adapter that matches your hardware, then click OK. If you have an installation disk for this feature, click Have Disk.

- v) Click OK, then the driver will be installed successfully. A RNDIS device like below figure will be shown in PC Device Manger

- g) If the above RNDIS device has been already shown in Device Manager, WMDC doesn't launch successfully yet, especially for Win10 operating system. Please run a utility called "HWSyncTools.exe".

HWSyncTools\_NoL  
ogo.exe
